

NOTCH FILTER

MFN-3300.4200.S5

3300MHz~4200MHz (REJECT BAND)

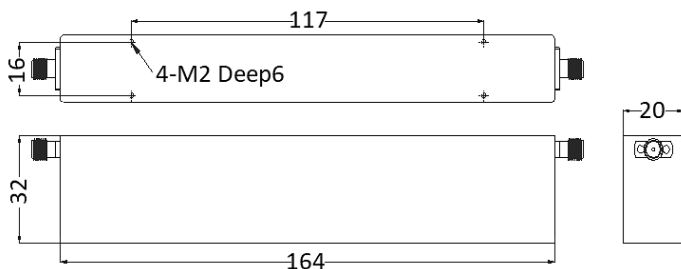

MVE's Notch filter can cut the guard band and preserve the band which you need in the specified frequency range. This type of filter is especially useful since you want to cut the band which is so closed to the in band. The products possess so superior performance with rejection.

SPECIFICATIONS

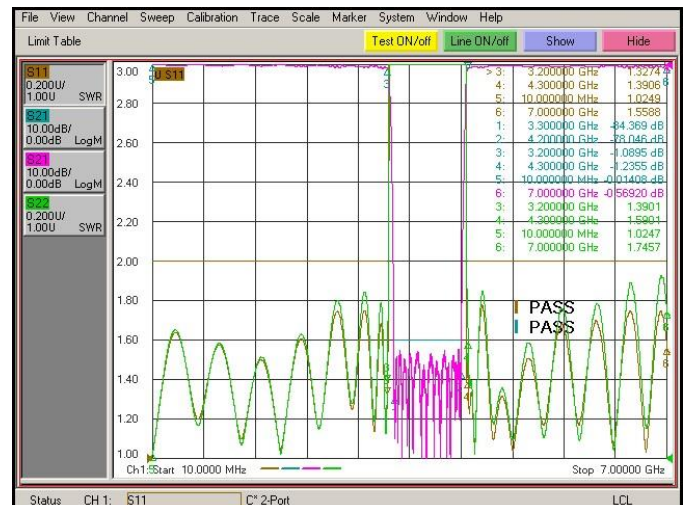

Part Number	MFN-3300.4200.S5
Reject Band	3300MHz~4200MHz
Pass Band	DC-3200MHz & 4300-7000MHz
Insertion Loss	2.0dB MAX.
Attenuation	≥70dB
VSWR	2.0:1 MAX.
Average Power	20W
Operational Temperature	0 to +60°C
Connector Type	SMA Female
Size	164 mm x 32 mm x 20 mm

Tolerance: ±0.5mm
